FOR IMMEDIATE RELEASE

OK International Relocates to New State-of-the-Art Headquarters

Cypress, CA — June 2016 — OK International, a subsidiary of Dover Corporation, has moved into its new, state-of-the-art world headquarters in Cypress, Calif. OK International, parent company of Metcal, Techcon Systems, Quant 3D and Proworks Software, is the main tenant in the 100,550 ft² building.

“I am extremely pleased with the new OK International headquarters and how quickly we have settled into our new facility,” said Christopher Larocca, President and CEO of OK International. “The extra space will enable us to better serve our customers, improve operational workflow and increase employee productivity.”

The new facility has a large demonstration and training space where customers can see Metcal and Techcon products in action and spend time learning how to use the equipment. “I am really looking forward to having customers visit our new facility and our demonstration and training area,” says Bryan Gass, Vice President of Sales and Marketing. “Our customers will get a first-hand look at the Metcal and Techcon products that will help them become more efficient.”

OK International’s new production and office facility is located at 10800 Valley View Street in Cypress, about three miles from the previous location. All of OK International’s Southern California employees now work at the new Cypress headquarters.
