

Organization Announcement

Dr. Adrienne Williams

SST International of Downey, Ca, is pleased to announce that Dr. Adrienne Williams has joined the company as Process Engineer.

Dr. Williams earned her Ph.D. in Engineering Physics and Materials Science from Wright State University, Dayton Ohio. She worked as a materials scientist at Wright Patterson Air Force Base Air Force Research Laboratory Materials and Manufacturing Directorate and was a Science Teaching Fellow at Vanderbilt University.

In her role at SST Dr. Williams will focus on developing and extending the company's core application technologies and develop new processes and materials to benefit SST's worldwide customer base.

SST International, of Downey, Ca, designs, manufactures and markets vacuum reflow systems to create void free and flux free eutectic die bonds and hermetically sealed packages for high performance electronic devices.

SST is a wholly owned subsidiary of Palomar Technologies, Carlsbad, Ca.
