PACE to Introduce New Low-Cost ADS200 AccuDrive™ Production Soldering Station at IPC Apex Booth #2405

Vass, NC – Jan 15, 2018 – PACE Worldwide announces the ADS200, a new high-power, low-cost production soldering station, to be introduced at IPC APEX on Feb 27-Mar 1, 2018. The ADS200 features the new TD-200 Cool-Touch™ Handpiece, with its sleek and ergonomic aluminum handle designed to stay cool and comfortable during

continuous production soldering. Blue Series Tip-Heater Cartridges integrate a high-accuracy sensor with a robust heater, delivering up to 120 Watts of power. Unlike curie point systems, select any temperature (from 380°F/193°C to 850°F/454°C) without changing the cartridge – one tip, any temperature. The quick-change cartridges can be quickly swapped while hot, and achieve set temperatures instantly. Yet the tip cartridges are less than half the price of most other cartridge style or curie point tips. PACE's new AccuDrive temperature control technology delivers unsurpassed thermal performance and highly accurate temperatures, without the need to change tip cartridges or calibrate. Its advanced electronics provide instantaneous load sensing and on-demand power to quickly reflow solder joints at the lowest, safest temperature required, regardless of the mass of the application. Intended for extreme, multi-shift production use, the ADS200 features a rugged, all-metal design, including housing, soldering iron and tool stand. The system is intuitive and easy to operate – just power it on, set the temperature with arrow keys and start soldering. No training required. For a limited time, the ADS200 AccuDrive Production Soldering Station is being offered at an introductory price of \$239 (£199/€225) each. For more information, please visit our website at www.paceworldwide.com/ads200.

About PACE®

PACE Worldwide has been providing the most innovative, cost-effective solutions in hands-on soldering, rework and repair of advanced electronics to companies and government around the globe for well over 50 years. Since the dawn of the modern electronics industry, PACE has played a key role in the development of groundbreaking products, training films, curricula, materials and electronic assembly standards,

including several soldering, surface mount and thru-hole rework videos co-produced with the IPC and industry.
