

## Press Release

Manchester, NH, November 2019

### Schleuniger, Inc. to Demonstrate Latest in Wire Processing at the IPC APEX Expo 2020

Schleuniger, Inc., a leading international manufacturer of high-precision [wire processing machines](#), will demonstrate select equipment from its comprehensive line of wire processing products at the 2020 IPC APEX EXPO, the largest electronics assembly exhibition in North America. The exhibition will be held at the San Diego Convention Center in San Diego, CA on February 4-6, 2020 and will include over 450 of the industry's top suppliers in the electronics manufacturing industry. Schleuniger will be at booth #3213 providing hands-on demonstrations of innovative wire processing solutions.

For the first time at the APEX Expo, Schleuniger will demonstrate the **MultiStrip 9480** [cut and strip machine](#) with **SmartDetect**, our highly innovative quality monitoring option. This sensor-controlled system monitors the complete stripping process and detects any contact between the stripping blade and the conductor ensuring 100% quality with no nicks, cuts or missing strands.

Also on display will be Schleuniger's latest generation of benchtop [coaxial cable stripping machines](#), the **CoaxStrip 6380** and **CoaxStrip 6580**. With a 20 percent increase in production output, this new family of programmable, multi-step rotary strippers allows for precise stripping of coaxial, triaxial and multi-conductor cable, as well as single conductor wire. Additional features include "Cable End Detection" for higher strip length precision, "Cable Diameter Verification" for quality assurance, an "Automatic Cable Retraction Function" for easier processing of long strip lengths, and new stripping head designs to ensure that even very thin, hard-molded or slightly out-of-round insulations can be stripped. This exciting new generation of coaxial cable stripping machines offers higher productivity and lower operating costs.

Attendees will have the opportunity to experience hands-on demonstrations of the **Mercury-4** [laser wire stripping machine](#), designed by Laser Wire Solutions. The machine strips wires and cables ranging in size from 0.0010 to 16 mm<sup>2</sup> (50 to 6 AWG) and guarantees high quality, nick-free stripping every time. The precision and flexibility of this machine produces high quality production results and offers a wide range of processing capabilities.

Other popular machines that will be part of the exhibition include the **EcoStrip 9380** [cut and strip machine](#), the **UniCrimp 100** [crimping machine](#), and a wide variety of benchtop [wire stripping machines](#). As always, Schleuniger's wire processing experts will be on hand to review your wire samples and help you find the right equipment for your specific applications.

#### About Schleuniger

The Schleuniger Group in Thun is a globally active technology company and a leading supplier to the wire processing industry. With its wholly-owned and independently managed company, DiIT, Schleuniger is also a leading player in digitalization and industrial IoT. Most of the Schleuniger Group's customers are suppliers to the automotive, entertainment and information industries, as well as to the communications sector. Schleuniger's products are used wherever precise connections and highest productivity are required. The company has development and production locations in Switzerland,
