Acculogic Appoints New Rep Firm to Expand Support in the Southwest

Markham, ON — December 2018 — Acculogic Inc., a global leader in electronic production test solutions is pleased to announce the appointment of Southwest Systems Technology, Inc. as its representative in the state of Texas.

Southwest Systems Technology was founded in 1989 with offices in Texas and Mexico, serving the electronic and semiconductor manufacturing industries. The company sells capital equipment, benchtop tools and manufacturing consumables, and its sales engineers are trained in the latest industry processes and technologies.

“I really enjoyed being an Acculogic customer at ACD, and I look forward to working with them again,” stated Scott Fillebrown, Managing Director at Southwest Systems Technology. “I believe they have the best test platform in the industry.”

Karim Dhekordi, General Manager of Acculogic, said, “Southwest’s industry and product knowledge will complement our expanding business. By working together, we can continue to increase our market share in the Southwest region. Clients will benefit from the capabilities of Scott and his team, to gain a deep and complete understanding of their requirements and present them with the right solutions to achieve their desired results.”

Acculogic’s flagship products, the [FLS980 Flying Probe tester](#), the [iCT7000 In-circuit tester](#), the [BRiZ Automated Test & Programming Stations](#), and the [ScanNavigator Boundary Scan test suite](#), help ensure that tomorrow’s technologies do not outpace today’s test capabilities. These products are highly advanced, scalable solutions made to solve a wide range of test challenges.
