## **Nordson SELECT Aids in COVID-19 Ventilator Board Manufacturing**

- **East/West Manufacturing Enterprises installs Nordson SELECT Cerno® 103IL selective soldering system for ventilator board production**

**Liberty Lake, WA, USA – 9 June 2020** – Nordson SELECT, a Nordson company (NASDAQ: NDSN), is pleased to announce that East/West Manufacturing Enterprises has purchased and installed a Cerno® 103IL selective soldering system for ventilator board production.

“Many customer projects have boards that require advanced through-hole component soldering,” said Andy Salo, President and CEO of EastWest. “We added selective soldering capability to increase our efficiency for faster, high quality soldering while reducing costs for our customers. This is particularly useful as we produce boards for COVID-19 ventilators and other mission critical through-hole projects.”

“We are pleased to get East/West installed and operating our selective soldering system during this difficult time,” said Adam Streeter, Service Manager at Nordson SELECT. “Our production team was able to deliver the Cerno® 103IL in record time and our service team was able to work within their strict manufacturing protection measures including face masks and temperature checks, to install the equipment quickly and with minimal disruption.”

East/West Manufacturing provides industry leading electronics manufacturing services including printed circuit board assembly and optimized supply chain solutions for companies in a wide range of industries including industrial and commercial OEMs, medical, automotive and military related device manufacturers. Headquartered in Austin, Texas, East/West’s employees are IPC certified and have an average industry tenure of over 15 years. Their facilities are certified to ISO 9001:2015 and ISO 13485:2016. ### **About Nordson SELECT**

Nordson SELECT, is a leading worldwide supplier of selective soldering systems including Novo® standalone machines offering exceptional value and superior process capability ideal for batch production, Cerno® in-line systems delivering uncompromised quality and productivity for demanding soldering applications, and Integra® multi-station modular systems designed to meet

the most challenging high-volume requirements by combining parallel processing with multiple soldering nozzles for the ultimate in flexibility and maximum throughput. To find out more, visit [www.nordsonSELECT.com](http://www.nordsonSELECT.com), or on social media.

### **About Nordson Corporation**

Nordson Corporation (Nasdaq: NDSN) is one of the world's leading producers of precision dispensing equipment that applies adhesives, sealants, coatings and other materials to a broad range of consumer and industrial products during manufacturing operations. The company also manufactures equipment used in the testing and inspection of electronic components as well as technology-based systems for curing and surface treatment processes. Headquartered in Westlake, Ohio, Nordson has direct operations and sales support offices in more than 30 countries.
