Nordson SELECT Appoints neutec electronic ag as Swiss Distributor for Entire Selective Soldering Product Line

- **Neutec electronics ag provides customers throughout Switzerland with equipment selection, process expertise and technical support**

Liberty Lake, WA, USA – 28 July 2020 – Nordson SELECT, a Nordson company (NASDAQ: NDSN), is pleased to announce that neutec electronics ag has been appointed as distributor for the entire SELECT product line throughout Switzerland. The team at neutec electronics ag serves a wide range of customers in the Swiss automotive, medical and mobile device markets.

Philipp Grosse, European Sales Manager of Nordson SELECT stated, “We are delighted to have neutec electronics ag as members of our sales team with their extensive sales and service network.” Grosse added, “In addition to Nordson SELECT, neutec electronics ag currently represents other well-known Nordson brands including Nordson ASYMTEK and Nordson DIMA.

“We are pleased to announce we have intensified our cooperation with Nordson Electronics Solutions,” explained Gianni Affinito, Managing Director of neutec electronics ag. “Nordson SELECT is considered a highly customer-oriented company and as such the fundamental focus in product development is always in the customer’s perspective. The whole neutec electronics ag team is looking forward to the new challenge with the innovative products of Nordson SELECT. We look forward to a successful cooperation with our customers as well as with Nordson SELECT.

About Nordson SELECT

Nordson SELECT, is a leading worldwide supplier of selective soldering systems including Novo® standalone machines offering exceptional value and superior process capability ideal for batch production, Cerno® in-line systems delivering uncompromised quality and productivity for demanding soldering applications, and Integra® multi-station modular systems designed to meet the most challenging high-volume requirements by combining parallel processing with multiple soldering nozzles for the ultimate in flexibility and maximum throughput.
