26th September 2018

Ellsworth Adhesives Europe Announce Special Offer on Metcal Products

Ellsworth Adhesives Europe is pleased to announce a special promotion on Metcal's CV-5210 Connection Validation™ Soldering Station. Branded as the next big step in soldering process control, the single-port CV-5210 is embedded with SmartHeat™ technology, which senses the thermal load and instantly delivers power on demand directly to the joint. This ensures soldering is performed in a fast, safe and repeatable process with no calibration required.

A unique feature of this soldering system is its ability to evaluate the quality of the solder joint by calculating the intermetallic compound formation and offering feedback to the operator. By doing so, the patented Connect Validation™ technology takes the risks associated with soldering out of the hands of the operator whilst assuring a good solder joint. The introduction of Connection Validation™ technology is an industry first as it offers not only control of the tip temperature, but also closed loop feedback in real time via the integrated light in the handpiece. The Metcal CV-5210 offers the user many further advantages including improved quality, enhanced process control and greater compliance.

In the special package offer, the customer can get the new CV-UK6 High Thermal Demand hand-piece upgrade kit and HCV-7CH0025S 2.5mm Chisel tip alongside a CV-5210 system for just £629. With a standard combined price of £768.70, the package deal offers an impressive saving of £139.70. The upgrade kit is incredibly beneficial as Metcal's High Thermal Demand hand-pieces and tips transform the CV-5210 Soldering System into a powerhouse. They provide a boost in performance by more effectively delivering thermal energy to the most demanding loads. Alongside the handpiece, the upgrade kit includes an additional work stand which allows for optimum comfort even on large industrial jobs.

Due to the popularity of the CV-5210 system, it is rare to find it on special promotion. To take advantage of this fantastic offer, customers should enter the promotional code CV-5210-PROMO18 at the checkout. All three items must be in the basket in order for the discount to be applied.

This promotion is limited to orders placed on or before December 31st 2018.

Ellsworth Adhesives Europe is an official distributor of Metcal Soldering Systems and equipment. To enquire about this system or any other products within the Ellsworth range please contact: infoeurope@ellsworth.com.

About Us

Ellsworth Adhesives Europe is a distributor of adhesives, specialty chemicals and adhesive dispensing equipment, the Ellsworth Adhesives product portfolio is huge and encompasses all of the industry's leading brands including Loctite, Dowsil (Dow Corning), Dymax, Lord and many more.

From epoxy adhesives and potting systems, to conformal coatings and surface preparation products, Ellsworth Adhesives has a material to suit every application. Alongside adhesive materials, we also supply a wide range of manual and automated adhesive dispensing equipment including tips, cartridges and static mixers as well as dispensers and dispensing robots.

At Ellsworth Adhesives Europe we recognise that our customers have different needs. We cater to customers who already know the exact products they want and will supply them with a quick and efficient turnaround, yet we also cater for customers requiring a more technical, in depth service.

Whether you are working on a new or existing application and are wondering which solution will benefit your specific end product the most, our expert sales team can help! With our excellent technical knowledge, we can analyse your end product and process requirements and recommend the material and dispensing system that will work best.
