**Aegis Software to Showcase Latest Manufacturing Execution
System Innovations at SMTA's Guadalajara, Mexico Forum 2018**

*Delivering a Truly Transformative, Uniquely Adaptive and Unprecedented Platform for World-Class
Manufacturing Companies*

HORSHAM, PA, November 2018, Aegis Software, a global provider of Manufacturing Execution
Software (MES), announced today that they will be showcasing their latest technology at the SMTA
Guadalajara Forum in Jalisco, Mexico, this November 14th-15th. Aegis will demonstrate the latest
release of their industry-leading FactoryLogix® MES platform, which now includes the most
comprehensive Quality Management System available.

In its eighth year of events, SMTA's Guadalajara Chapter brings together a network of professionals for a
high-level technical conference to share technical solutions and develop practical experience within the
Electronics Manufacturing sector in Mexico. The conference and trade show will cover industry-leading
topics that include real time production visibility, collaborative robots for the shop floor, and best
practices for Industry 4.0 data optimization.

FactoryLogix is a holistic and modular platform that provides manufacturers immediate visibility into
the state of the factory, allowing operators to prioritize resources, increase overall efficiency, and
reduce risk. The end-to-end platform MES platform manages the entire manufacturing lifecycle, helping

companies accelerate product introductions, streamline processes, improve quality and traceability, and reduce costs for competitive advantage.

To learn more about how your organization can bring greater speed, control, and visibility to your manufacturing operations, stop by the Aegis booth #109 at SMTA Guadalajara for a one-on-one meeting with an Aegis representative. www.aiscorp.com
