1 Click SMT Awarded for New Lead-Free Wave Soldering Machine

DONGGUAN, CHINA — November 2021 — 1 Click SMT Technology Co., Ltd is pleased to announce that it received a 2021 GLOBAL Technology Award in the category of Wave Soldering for its new E-THERM NRW Series Lead-Free Wave Soldering Machine. The award was announced during a ceremony that took place Tuesday, Nov. 16, 2021 during productronica in Munich, Germany.

The NRW Series features an automatic solder pot (in/out & up/down), a spray nozzle cleaning system, and even spray for minimized overlapping. The heavy-duty conveyor rail has a robust conveyor finger. Additionally, the system has five individual preheating zones.

The NRW wave solder machine offers an optional “upgrade fluxing with selective fluxing built in”. With this option, only the desired areas will be fluxed without stopping the conveyor, saving 70--85% flux usage.

The NRW Series offers an 1800mm preheating length, with bottom hot air convection preheating zone. > Unique 5 bottom preheating zones, for a smooth preheating profile. The fully Titanium solder pot design translates into a long lifetime.

The NRW Series provides the quickest and safest way to switch between leaded and lead-free processes. The Titanium soldering pot is 100% capable of lead-free application. An optional fume extractor does not require an exhaust pipe outside of the machine. When upgraded to built-in selective fluxing, flux usage will be reduced dramatically, reducing smoke output.

The GLOBAL Technology Awards have recognized the very best new innovations in the printed circuit assembly and packaging industries since 2005. The prestigious awards contest has been bringing together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward. For more information, visit www.globalsmt.net/awards.

1 Click SMT manufactures selective soldering, wave soldering and PCB handling equipment under the Sasinno brand. The brand stands for “Smart and Steady Innovation.” For other equipment, such as AOI, reflow ovens, conformal coating, dispensing, printers, SPI, odd insertion, etc, 1 Click SMT has an experienced engineering team to source these machines and qualify them.

1 Click SMT has established a strong worldwide distribution channel. The company has well-trained engineers to support its customers in any location.

1 Click SMT makes it easy for customers with “1 CLICK”.
