

Answers to Conformal Coating Process Questions in a free Webinar with Koh Young and other Industry Leaders

Atlanta, GA – Koh Young, the industry leader in True3D™ measurement-based inspection solutions, will participate in a free panel discussion on Tuesday, 18 May 2021 at 10:30AM EST. Register today and secure your seat in the virtual event to learn more about best practices for the conformal coating process from Koh Young and others.

Conformal coatings are expanding by application, but process knowledge on how to apply coating to avoid defects and reduce field failures is a key concern. This panel will discuss solutions for handling, storing, applying, and inspecting coatings to help you gain optimum adhesion, coverage, and yield.

"Conformal coating protects and isolates electronic circuitry from moisture, debris, corrosion, and shock, plus it adds mechanical stability to reduce failures and improve reliability. It is a common process used in automotive, military, aerospace, medical, lighting, and mobile applications," said Heriberto Cuevas, Application Engineering Project Manager at Koh Young America. "Using patented technologies, our Neptune is the industry's first 3D in-line inspection solution for dispensed materials, including transparent and conformal coating materials. The system allows manufacturers to explore the depths of its process and accurately find defects with 2D, 3D, and non-destructive cross-section views."

Additionally, this panel will discuss strategies for optimizing the process. Register for the FREE webinar [here](#) or copy this link https://us02web.zoom.us/webinar/register/WN_CTp3IQoKRAq-Zw1OrjC4w into your browser. Shortly after the panel has been broadcast, the replay will be available on demand at <http://bit.ly/2JWRGCo>.

If you cannot attend the webinar, you can learn more about Koh Young and its award-winning inspection solutions by visiting its regional website at kohyoungamerica.com.

###

About Koh Young

Established in 2002, Koh Young pioneered the market by launching the first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D™ measurement-based inspection technology, Koh Young has developed new solutions for challenges with Machining Optical Inspection (MOI), Dispensing Process Inspection (DPI), and Semiconductor Packaging Inspection (MEISTER Series), as well as branching out to Medical Robotics for brain surgery (KYMERO). Through its technological innovations, Koh Young has secured thousands of global customers, and maintains the largest global market share in the SPI and AOI markets. Additionally, by adopting its user-centric R&D activities, it continues to leverage core competencies and develop innovative solutions for new and existing markets. Its activities stem from the corporate headquarters in Korea to its global sales and support offices in Europe, Asia, and the Americas. These local facilities ensure it keeps in close contact with the market, and more importantly, its growing customer base to provide access to an award-winning network of inspection and measurement experts. Learn why so many electronics manufacturers trust Koh Young for reliable inspection at kohyoung.com.
