

The Inaugural Koh Young Future Forum 2021 exploring "The Next Smart Factory Wave" begins on 10 June 2021

2021-05-27 – Seoul, Korea – Koh Young Technology, the industry leader in True3D™ measurement-based inspection solutions, will deliver its inaugural virtual Future Forum 2021 in a 9-part webinar series beginning on 10 June 2021. Register today and secure your seat in the virtual event to learn more about the next smart factory wave from Koh Young's panel of experts.

Scott Kim, Technical Sales Manager at Koh Young Technology will start the series with how manufacturers can create an adaptive, connected smart factory. From this starting point, industry experts from Koh Young team will explore various elements including the driving forces behind the digital transformation of manufacturing, using Artificial Intelligence (AI) to transform production processes, as well as several technology trends including Electric Vehicles (EVs), flexible circuits, dispensing process inspection, and semiconductor packaging, as well as mini and micro-LEDs.

Future Forum 2021 will run for 5 consecutive weeks from 10 June 2021 to 8 July 2021 on every Tuesday and Thursday. The team of experts will present on the following topics, which will be supplemented with market updates, technical trends, and key applications.

Day & Date	Webinar Topic	Registration Link
Thursday Jun. 10, 2021	Create an Adaptive, Connected Smart Factory	Register Now
Tuesday Jun. 15, 2021	Driving towards an EV Future	Register Now
Thursday Jun. 17, 2021	Upgrade your Printing Process	Register Now
Tuesday Jun. 22, 2021	What's around the bend: Flex Circuit Trends	Register Now
Thursday Jun. 24, 2021	Transform your Processes with AI	Register Now
Tuesday Jun. 29, 2021	Integrate Digitalization into your Factory	Register Now
Thursday Jul. 1, 2021	What's ahead for Semiconductor Packaging?	Register Now
Tuesday Jul. 6, 2021	The Future is Bright: Micro and Mini-LED Displays	Register Now
Thursday Jul. 8, 2021	Examining the Future of Dispensing Inspection	Register Now

Given the growing interest in these topics, the English webinars will be delivered three times on each scheduled day. Regardless the time zone, there will be a live Q&A session supported by Koh Young experts after each seminar.

If you cannot attend Koh Young Future Forum 2021, you can still learn more about Koh Young and its award-winning solutions by visiting our website at www.kohyoung.com.

###

About Koh Young

Established in 2002, Koh Young pioneered the market by launching the first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D™ measurement-based inspection technology, Koh Young has developed new solutions for challenges with Machining Optical Inspection (MOI), Dispensing Process Inspection (DPI), and Semiconductor Packaging Inspection (MEISTER Series). Through its technology innovations, Koh Young has secured thousands of global customers, and maintains the largest global market share in the SPI and AOI markets. Additionally, by adopting its user-centric R&D activities, it continues to leverage core competencies and develop innovative solutions for new and existing markets. Its activities stem from the corporate headquarters in Korea to its global sales and support offices in Europe, Asia, and the Americas. These local facilities ensure it keeps in close contact with the market, and more importantly, its growing customer base to provide access to an award-winning network of inspection and measurement experts. Learn why so many electronics manufacturers trust Koh Young for reliable inspection at kohyoung.com.
