

Koh Young Shares Insights about Automating the Inspection Process

Atlanta, GA – Koh Young, the industry leader in True3D™ measurement-based inspection solutions, will participate in a free panel discussion about automating the electronics assembly inspection process on Tuesday, 06 July 2021 at 10:30AM EST. Register today and secure your seat in the virtual event to learn more about the best practices for the automatic optical inspection process from Koh Young America and others. [Register](https://action.globalsmt.com/c1.pl?d75b2cd565b10e4900ae4096e6dc26f8f20681acf9316cdb) by pasting the following link into your browser <https://action.globalsmt.com/c1.pl?d75b2cd565b10e4900ae4096e6dc26f8f20681acf9316cdb>.

Inspection is performed at various points on the production line and acts as the eyes of a data-driven decision process. For manufacturers seeking continuous improvement, they should focus their efforts and process parameters on improving their first pass yield using trustworthy data from automated inspection solutions specific to the solder paste inspection (SPI) process, as well as pre-reflow and post-reflow automated optical inspection (AOI) points. Ramon Hernandez, Country Manager for Mexico and South America at Koh Young with other panelists will address inspection topics with a live question and answer session.

“By converting measurement data into process knowledge, Koh Young inspection solutions help engineers make effective, quality-driven decisions. By combining our award-winning products with our proprietary AI-powered analysis software, we can deliver autonomous process optimization,” shared Ramon. “I am excited to participate in these panels again. I look forward to sharing how our inspection process expertise can help manufacturers detect process trends, optimize production in real-time, and trace productions to help them increase quality and reduce costs.”

After the panel has been broadcast on 06 July 2021, it will be available for viewing by registered attendees at <http://bit.ly/2JWRGCo>. If you cannot attend the panel, you can still learn more about Koh Young and its award-winning solutions by visiting our regional website at www.kohyoungamerica.com or by attending our Future Factory 2021 webinar event going on Tuesdays and Thursdays through 08July2021.

###

About Koh Young

Established in 2002, Koh Young pioneered the market by launching the first 3D Solder Paste Inspection (SPI) system using a patented dual-projection Moiré technology. Since then, it has become the global leader in 3D measurement-based SPI and Automated Optical Inspection (AOI) equipment for the electronics industry. Based on its True3D™ measurement-based inspection technology, Koh Young has developed innovative solutions for challenges spanning machined parts, dispense processing, and semiconductor packaging, as well as branching out to medical robotics for brain surgery. Through its technological innovations, Koh Young has secured thousands of global customers and is recognized with the largest global market share in the SPI and AOI markets. Additionally, by adopting its user-centric R&D activities, it continues to leverage core competencies and develop innovative solutions for new and existing markets. Its activities stem from the corporate headquarters in Korea to its global sales and support offices in Europe, Asia, and the Americas. These local facilities ensure it keeps in close contact with the market, and more importantly, its growing customer base to provide access to an award-winning network of inspection and measurement experts. Learn why so many electronics manufacturers trust Koh Young for reliable inspection at kohyoung.com.
