KYZEN Picks up 4th Award for Its New AQUANOX A4382 Advanced Cleaning Agent

NASHVILLE — November 2021 — KYZEN, the global leader in innovative environmentally friendly cleaning chemistries, today announced that it was awarded a 2021 GLOBAL Technology Award in the category of Cleaning Materials for its AQUANOX A4382. The award was announced during a ceremony that took place Tuesday, Nov. 16, 2021 during productronica in Munich, Germany.

“It is fitting that the Global Technology Awards recognizes AQUANOX A4382 due to its great success across the globe,” commented Tom Forsythe, KYZEN Executive Vice President. “Customers depend on A4382 when cleaning OA water-soluble flux to ensure that their final product will meet reliability standards and specs for their customers.”

The all new AQUANOX A4382 advanced cleaning agent is targeted at organic acid fluxes. This chemistry most effectively cleans residues at lower concentrations. While de-ionized water is not enough to provide sufficient, consistent cleaning, A4382 completely removes all water-soluble residues and other possible manufacturing contaminates. AQUANOX A4382 especially cleans underneath low standoff or flush mount components.

The GLOBAL Technology Awards have recognized the very best new innovations in the printed circuit assembly and packaging industries since 2005. The prestigious awards contest has been bringing together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward.
