KYZEN to Provide Solutions to Drive Reliability at The Battery Show

NASHVILLE — September 2024 — KYZEN, the global leader in innovative environmentally responsible cleaning chemistries, will exhibit at The Battery Show North America from October 7-10 at Huntington Place in Detroit, MI. The KYZEN team will highlight electronics cleaner AQUANOX A4727 and metal cleaner METALNOX M6422 at Booth #5705.

Just as The Battery Show urges attendees to immerse themselves in battery innovation, KYZEN leverages more than 30 years of cleaning experience to produce cleaning solutions to meet the challenges associated with cleaning high performance electronics and metals.

[AQUANOX A4727](#) is an award-winning aqueous assembly cleaner proven effective on all solder flux residues including Pb-free and no-clean formulations, removing them from complex, dense assemblies. A4727 is used at low concentrations giving it a long bath life and is proven compatible with an array of components, coatings, labels and equipment.

[METALNOX M6422](#) is an aqueous blend chemistry designed to clean and prepare extruded aluminum surfaces. M6422 effectively cleans and removes machining contaminants and aluminum oxide to enhance subsequent automated welding and coating operations. It is effective at concentrations lower than five percent and can be utilized in spray and immersion applications.

Additionally, KYZEN Business Development Manager Jason Schwartz will serve as one of four panelists for "Connecting EV Charging Station's reliability with IPC Electronics Industry Standards." The discussion will take place on Wednesday, June 9 at 1:15 PM CT in the show's Orange area.

About KYZEN

KYZEN is a global leader in providing environmentally responsible, RoHS compliant precision cleaning chemistries for industries ranging from electronics and advanced packaging to metal finishing and aerospace applications. Since its founding in 1990, KYZEN's innovative cleaning technologies, scientific expertise and customer support have been repeatedly recognized with the industry's most prestigious awards.
