Ventec Consolidates and Upgrades European Production and Logistics Center in Germany

Significant investment in manufacturing technology and warehousing facilities to strengthen site in Ventec's global supply chain

October 10, 2024 – Ventec International Group has begun consolidating operations and installing new, state-of-the-art facilities at its European production and logistics hub in Kirchheimbolanden, Germany.

Following the PCB asset acquisition agreement with Holders Technology on October 21, 2021, Ventec is now embarking on the next phase of their customer-centric expansion plans. This will involve the consolidation of the current two independently situated facilities in Kirchheimbolanden, Germany into a single modern European Production and Logistics Center. When completed, the comprehensive upgrade of the 13,500 m² campus, close to the town and amenities, will provide modern offices, fully equipped production halls, and a new, €2-million, 1800 m² warehouse.

The enhanced facilities will include a new enlarged prepreg cutting cleanroom, a new hall for cutting of the full range of Ventec laminate materials, and new, state-of-the-art drilling and milling machines for tooling our range of drill entry and exit and lamination consumable materials. A modern dust-extraction system meeting the latest CO₂-reduction requirements will maintain the environment in the non-CCL area, while solar power and heat pumps will ensure buildings meet the latest eco guidelines.

The production halls will separate the areas for handling varnish products from Taiyo, Ventec CCL & prepreg, and distribution release films and non-CCL materials, enabling each to benefit from an optimized layout to ensure efficient and smooth process flows that support both volume and quick turn service to our customers in the EMEA region.

"We are investing in our vision to take the EMEA business forward into the future, as we strive to continually improve services for customers, enhance delivery performance, raise quality, and ensure the best possible working environment for our people," said Frank Lorentz, General Manager of Ventec's wholly owned subsidiary Ventec Central Europe GmbH, at the groundbreaking ceremony commencing the project.

Mark Goodwin, COO EMEA & Americas added: "The investment in our European Production & Logistics Center is a testament to Ventec's commitment to driving sustainable development across

our global supply chain network. The increased footprint with enhanced volume and quick turn servicing capability and large warehousing facilities in a new centralized building is critical to the successful execution of our growth strategy. When completed, our new facilities will contribute towards further strengthening the global Ventec supply chain to meet the constantly evolving needs of the electronics manufacturing community throughout EMEA and worldwide.”

The project is organized to ensure the business at Kirchheimbolanden, Germany can maintain continuous production and delivery of ongoing orders. Work is scheduled to be completed in the final quarter of 2025.

About Ventec International Group

Ventec International Group Co., Ltd. is a Taiwan Stock Exchange listed (TWSE:6672.TT) global supplier of advanced base materials for the PCB industry worldwide. Ventec’s range of laminates & prepregs include signal integrity/high-speed digital, RF/Analog & high-performance IMS material technology, and an advanced range of thermal management solutions designed for specialized use in industries including automotive, communication, aerospace, and defense. Ventec also provides value-added one-stop shop services to support PCB manufacturing and distributes a range of third-party materials and automated production equipment that complement its core product offering. Operating its own fully controlled and managed global supply chain and worldwide sales and technical

support network, Ventec has manufacturing, and distribution facilities located throughout Asia, Europe, and the US, certified to AS9100 Revision D, IATF 16949:2016 and ISO 9001:2015. For more information, visit www.ventecamines.com.

Safe Harbor Statement

This press release contains projections and other forward-looking statements regarding future events or our future financial performance. All statements other than present and historical facts and conditions contained in this release, including any statements regarding our future results of operations and financial positions, business strategy, plans and our objectives for future operations, are forward-looking statements. These statements are only predictions and reflect our current beliefs and expectations with respect to future events and are based on assumptions and subject to risk and uncertainties and subject to change at any time. We operate in a very competitive and rapidly changing environment. New risks emerge from time to time. Given these risks and uncertainties, you should not place undue reliance on these forward-looking statements. Actual events or results may differ materially from those contained in the projections or forward-looking statements. Some of the factors that could cause actual results to differ materially from the forward-looking statements contained herein include, without limitation: (i) the contraction or lack of growth of markets in which we compete and in which our products are sold (ii) unexpected increases in our expenses, including manufacturing expenses, (iii) our inability to adjust spending quickly enough to offset any unexpected revenue shortfall, (iv) delays or cancellations in spending by our customers, (v) unexpected average selling price reductions, (vi) the significant fluctuation to which our quarterly revenue and operating results are subject, (vii) our inability to anticipate the future market demands and future needs of our customers, (viii) our inability to achieve new customer wins or for customer wins to result in shipments of our products at levels and in the timeframes we currently expect, (ix) our inability to execute on strategic alliances, (x) the impact of natural disasters on our sourcing operations and supply chain, and (xi) other factors detailed in documents we file from time to time with the Securities and Exchange Commission.
