AQS, Inc. Ramps up X-ray Capabilities with SEC

FREMONT, CA — September 2020 — AQS, Inc., a state-of-the-art EMS provider located in Silicon Valley, is pleased to announce that it has purchased an X-eye 5000N- 2D X-ray from SEC. The easy-to-use system is ideal for non-destructive analysis of semiconductor, SMT and electronic components.

The X-eye 5000N Series features a 100kV-130kV micro-focus closed-loop tube and high-definition flat panel detector. The system will be installed at AQS' Dallas facility. Bruce Lee, VP of Operations, stated: "We're excited to announce this acquisition. Our mission is to provide our customers a one-stop solution for all of their needs in high quality electronics manufacturing and engineering services so that they can thrive in any dynamic competitive environment."

SEC is a leading inspection equipment provider, providing industrial X-ray inspection systems and Scanning Electron Microscopes. Established in 1991, with almost 30 years of technical know-how, SEC is continuously developing the backbone of e-beam inspection equipment in Korea. For more information, visit www.seceng.co.kr/eng.com.

With a mission of providing customers with a high-quality one-stop solution for all their needs so that they can thrive in any dynamic competitive environment, the company works continuously to create the best product for its customers to dominate the market and raise the bar.
