For immediate release:

Aismalibar Adds Steven Calvert As Field Applications Engineer

Steven joins the Aismalibar team with over 25 years' experience working within the European and North American Manufacturing industries. He has utilized Lean Manufacturing methodology to successfully increase through put and on time delivery in all positions held. He demonstrates strong customer relation skills and experienced in all aspects of new product introduction and development.

Steven brings with him positive and proven leadership skills that encompass managing, developing, and motivating team members to achieve desired objectives.

"I am very much looking forward to working alongside the team at Aismalibar North America and developing long-term, meaningful client relationships." Said Steven Calvert.

About Aismalibar

Founded in 1934 and based in Barcelona, Spain, Aismalibar manufactures high end Copper and Metal Clad Laminates for the Printed Circuit Board Industry. Aismalibar's expertise lies in offering the best solutions to reduce the operational temperature of the Printed Circuit Boards. Aismalibar materials ensure quality and reliability of all the products that incorporate them.

Aismalibar has implemented a 100% proof test with 1-3KV (High Pot Test) to every IMS laminate that is produced. These materials minimize the use of supplementary fans or heat sinks, thus reducing production costs. Aismalibar now operates globally through several subsidiaries. Our priorities are, and have always been technological innovation and customer satisfaction.
