## **Aven Introduces Two High-Performance Diagonal Cutters for Precision and Durability**

**ANN ARBOR, MI — June 2024** — Aven is proud to announce the launch of two new diagonal cutters designed to meet the rigorous demands of industrial applications. These advanced tools include the Titanium Diagonal Cutter and the 304 Stainless Steel Cutter, both engineered for exceptional performance, precision, and durability.

Aven's new diagonal cutters are crafted to provide superior cutting capabilities and longevity, making them ideal for a wide range of industrial tasks. Both models are now available for purchase on the Aven website and through authorized distributors.

### **Titanium Diagonal Cutter**

Crafted from high-grade titanium, these cutting pliers offer exceptional strength and longevity. With an overall length of 150mm and a semi-flush blade type, they are designed for comfort and efficiency. The oval head style and 22mm head width allow for optimal control, making them perfect for cutting low carbon steel wire up to 1.6mm in diameter and soft copper wire up to 2.0mm. The lightweight design combined with a comfortable plastic grip reduces hand fatigue, allowing for extended use without discomfort.

### **304 Stainless Steel Cutter**

The 304 Stainless Steel Cutter by Aven is a versatile tool that combines durability with precision. Designed for various cutting applications, this cutter is perfect for professionals seeking reliability and accuracy. Crafted from high-grade 304 stainless steel, these pliers offer a semi-flush cutting edge perfect for low carbon steel wire up to 1.6mm in diameter and soft copper wire up to 2.0mm. The ergonomic PP+TPR grip ensures comfort during use, while the oval head style and 200mm overall length provide excellent control and leverage.

"Aven is dedicated to providing tools that meet the highest standards of quality and performance," said Mark

Kanpurwala, VP of Sales & Marketing at Aven. “Our new Titanium Diagonal Cutter and 304 Stainless Steel Cutter are designed to offer superior durability, precision and ease of use, making them essential tools for any industrial application.”
