## Why Settle for One Magnification When You Can Have Two?

**ANN ARBOR, MI — December 2022** — Aven, a full-service technology provider, introduces the ProVue Solas Magnifying lamp. The ProVue Solas allows users to switch between two interchangeable magnifying lenses for maximum flexibility.

Aven's ProVue Solas XL58 model offers the flexibility of using the included 8-Diopter lens (3x magnification), or an optional 5-Diopter lens (2.25x magnification, sold separately). It features 60 ultra-bright SMD LEDs with brightness controls, a fully enclosed spring-balanced arm and protective lens cover.

Each model is compatible with two lenses to help users optimize the ProVue Solas for the right applications. Additionally, it includes a heavy-duty mounting clamp that securely mounts to the side of work benches.

Aven has expanded its expertise in the realm of design and customized configuration of advanced video inspection systems. The company's solution-based experts possess the ability to recommend and create complete optical systems according to customers' needs and budgets.

Aven also provides a variety of ancillary services such as product assembly, custom parts and tooling, and distribution, all of which are coordinated from its Michigan headquarters. To learn more, call (734) 973-0099 or email [sales@aventools.com](mailto:sales@aventools.com).
