Aven to Showcase the Mighty Scope ClearVue at the SMTA Silicon Valley Expo

ANN ARBOR, MI — November 2022 — Aven, a full-service technology provider, will exhibit at the SMTA Silicon Valley Expo & Tech Forum, scheduled to take place Thursday, Dec. 8, 2022 in Sunnyvale, California. The Aven team will highlight its broad product line of optical inspection equipment components.

One of the highlighted products at the event, the Mighty Scope ClearVue has a built in 5" high resolution LED screen and offers a magnification range of 8x -25x.

The Mighty Scope ClearVue's rechargeable battery allows users to operate the microscope without a power supply for hours, thus making it suitable for field projects. The microscope also can be connected to an external monitor via an HDMI output for viewing images on a larger screen. Images can be saved on the included Micro SD card. The ClearVue can be mounted onto a variety of stands to suit any application.

Aven has expanded its expertise in the realm of design and customized configuration of advanced video inspection systems. The company's solution-based experts possess the ability to recommend and create complete optical systems according to customers' needs and budgets.

Aven also provides a variety of ancillary services such as product assembly, custom parts and tooling, and distribution, all of which are coordinated from its Michigan headquarters. To learn more, call (734) 973-0099 or email sales@aventools.com.
