## News Release

### **FOR IMMEDIATE RELEASE**

## **BTU to Unveil New Aurora™ 200N Oven at productronica 2023**

NORTH BILLERICA, Mass., September 2023 — BTU International, Inc., a leading supplier of advanced thermal processing equipment for the electronics manufacturing market, will exhibit at productronica 2023, scheduled to take place Nov. 14-17 at the Messe München in Munich, Germany. BTU International is proud to co-exhibit in Hall A4, Stand 318 with their long-time partner in Germany, Stratus Vision.

"The Aurora 200N is the largest reflow oven ever produced by BTU," said Oliver Wehner, European sales manager. "With features like closed-loop convection control, our reflow ovens have long been known for providing superior throughput – now with 200 inches of heat we will be able support even faster line speeds," added Wehner.

The new Aurora 200N will be on display in BTU's stand at productronica in Munich. With 200 inches of heat, the system supports line speeds that are up to 25% faster than those supported by the Aurora 150N introduced earlier this year. In addition, the system has a number of unique features, specific to its size, including the option to ship the unit in two pieces.

The Aurora 200N represents a significant leap forward in reflow oven technology, with BTU's unwavering commitment to innovation. This cutting-edge system boasts a host of impressive features, including modern conveyor options, flexible heating and cooling configurations, an updated user interface, integrated Aqua Scrub™ flux management technology, Smart Power energy savings software, and advanced process control technologies.

Don't miss the opportunity to experience the future of reflow oven technology and award-winning thermal profiling tools at booth Hall A4, Stand 318 at productronica Germany 2023.

**About BTU International**

BTU International, a wholly-owned subsidiary of Amtech Group (Nasdaq: ASYS), is a global supplier and technology leader of advanced thermal processing equipment in the electronics manufacturing market. BTU's high-performance reflow ovens are used in the production of SMT printed circuit board assemblies and in semiconductor packaging processes. BTU also specializes in precision controlled, high-temperature belt furnaces for a wide range of custom applications, such as brazing, direct bond copper (DBC), diffusion, and sintering. BTU has operations in North Billerica, Massachusetts, and Shanghai, China, with direct sales and service in the U.S.A., Asia and Europe. Information about BTU International is available at [www.btu.com](http://www.btu.com).
