

CalcuQuote Enhances Procurement Efficiency with Texas Instruments' Backlog API Suite Integration

Dallas, US, August 27, 2024 – CalcuQuote, a leading supply chain solutions provider for the electronics industry, is excited to announce its integration with Texas Instruments' (TI) complete [Backlog API suite](#). Customers using the API can schedule deliveries, change purchase orders, receive advanced ship notices, and more. Ever ready to support customers, [CalcuQuote's purchasing platform](#) seamlessly integrates with the Backlog API suite and is ready to integrate with any ERP API. This offers significant operational efficiencies and potential cost savings for all participants.

“We've observed a growing demand from our customers to incorporate sophisticated supply chain capabilities like those of the TI Backlog API,” said David Sharp, CEO at CalcuQuote.

“CalcuQuote's unique expertise positions us to lead the way on all value-added integrations like we have with dozens of global suppliers.”

CalcuQuote offers comprehensive, out-of-the-box support for TI's Backlog API suite. This allows clients to place backlog orders with multiple scheduled releases, monitor order status, update existing orders, and more –all directly within the CalcuQuote procurement platform.

While CalcuQuote customers already benefit from access to pricing from global suppliers and the ability to place orders within a single, streamlined platform, this new integration offers an additional option for managing their procurement of TI components.

As the electronics industry increasingly embraces digital transformation and automation, CalcuQuote continues to lead the way in driving greater efficiency and innovation across manufacturers' supply chains.

About CalcuQuote

CalcuQuote provides software solutions that optimize supply chain operations across sourcing, purchasing, quoting, and supplier collaboration, serving as a strategic partner to EMS companies, OEMs, and component suppliers. The CQ platform offers access to real-time supply data and seamless API integrations, ensuring end-to-end management that significantly improves the speed, accuracy, and efficiency of supply chain processes. Founded in 2014, CalcuQuote is now part of the Elisa Group and serves hundreds of companies worldwide. Committed to reinventing the supply chain, CalcuQuote has established its platform as an indispensable system for the future of the electronics industry.
