FOR IMMEDIATE RELEASE

Creation Technologies Named Overall Winner of 2024 Circuits Assembly's Service Excellence Awards

BOSTON, MA — October 24, 2024 — [Creation Technologies](http://www.creationtech.com), an end-to-end, scalable Specialty Global Electronic Manufacturing Services provider, is proud to announce that it has been recognized as the Overall Winner at the 2024 Service Excellence Awards (SEA) in the EMS category for companies over \$500 million in revenue. The award was presented during a special ceremony at the 2024 SMTA (Surface Mount Technology Association) International event, resulting in the company's tenth consecutive Service Excellence Award win.

Sponsored by CIRCUITS ASSEMBLY, the Service Excellence Awards honor the best companies in the electronics manufacturing industry based on direct customer feedback. Now in its 32nd year, the SEAs are the only awards program in the industry that uses customer satisfaction surveys to determine the winners. Participants are evaluated across key categories including dependability, manufacturing quality, technology, responsiveness, and value for the price.

"It is such a privilege to be recognized by the great customers we serve," said Stephen P. DeFalco, Chairman and CEO of Creation Technologies. "I am so proud of my employees for continually delivering exceptional service, innovative solutions, and best-in-class support to our customers. This award also demonstrates our commitment to building strong partnerships and maintaining the highest standards of manufacturing excellence."

Creation Technologies has long been a trusted partner for Aerospace & Defense, Medical Device, and Tech Industrial OEMs, offering end-to-end EMS solutions designed to enhance operational efficiency and product quality. With a global footprint, advanced manufacturing capabilities, and a customer-centric approach, Creation Technologies continues to set the standard for high-quality EMS services.
