Vayo Technology’s DFX Execution System Accelerates Enterprise Digital Transformation at PCB West 2023

Vayo Technology, a global provider of industrial software solutions for interconnected electronic systems from design to manufacturing, is pleased to announce plans to exhibit at PCB West 2023. The event is scheduled to take place Wednesday, Sept. 20, 2023 at the Santa Clara Convention Center in California. Vayo Technology will discuss DFX know-how digitalization and how to build your own digital know-how library in Booth #510.

With its robust DFX Design Execution System Software, Vayo Technology is at the forefront of providing intelligent system platform solutions for enterprise electronic design and process departments. The system offers a transformative approach to automating the review, analysis, and digital management of PCB/PCBA design data.

PCB West 2023 provides a unique platform for industry professionals and enthusiasts to gather and explore the latest advancements in the field of printed circuit boards. Vayo Technology is excited to contribute its insights into DFX know-how digitalization and showcase how its solutions empower enterprises to optimize their design and manufacturing processes.

Visitors to Booth #510 can engage with the Vayo Technology team to gain insights into the benefits of DFX know-how digitalization. By streamlining and automating design data review and analysis, Vayo's solution enables businesses to enhance their overall productivity, reduce errors, and optimize collaboration between design and manufacturing teams.

Vayo Technology invites attendees to discover the potential of DFX know-how digitalization and explore the possibilities of building their own digital know-how library. The company's expertise in intelligent manufacturing solutions positions them as a valuable resource for professionals seeking to stay at the forefront of industry trends and advancements.
