

PRESS RELEASE

FHP Reps to Represent YXLON International X-ray Portfolio

Arlington, TX – October 2021 – YXLON International, a company of the Swiss tech holding Comet Group, is pleased to announce the appointment of FHP Reps as its representative throughout Texas, Oklahoma, Arkansas, Louisiana, Oklahoma, Arkansas, Missouri, Nebraska and Kansas.

“We are very excited to add YXLON to our line card,” stated Keith Favre, President of FHP Reps. “David and I are very selective in the companies we represent; we only want the best-in-class products and support for our customers. YXLON fills a hole in our product offering with their full line of X-ray products, and we are excited to bring them to our market.”

FHP provides best-in-class equipment, consumables and services to the electronics manufacturing industry. Unlike many rep firms however, FHP does not specialize in just equipment or supplies, but focuses on providing solutions.

YXLON stands for quality assurance for all types of cast parts, tires, electrical and electronic components, turbine blades, welded joints and a lot more. The company’s product portfolio includes X-ray systems for installation in radiological inspection envelopes, universal X-ray inspection systems on the basis of fully shielded devices, as well as solutions specific to individual customers. Whether in manual, semi, or fully automated operation, our inspection systems are ideal for deployment in research and development and can be integrated into any production process.
