

Free iamcam webinar

The perfect automated PCB front-end workflow

At last year's Productronica in Munich, Ucamco presented the concept of **iamcam**. As the concept has now fully come to fruition, we are happy and proud to present the newest web-based client/server front-end software in our webinar series.

iamcam is **the perfect automated PCB front-end workflow**. It comes with numerous significant advantages:

- Avoid most human errors, increase efficiency & throughput, save time & money
- Seamless integration with 3rd party systems
- Compatible with your incumbent CAM system

The **iamcam webinar** will take place on October 6 with sessions in the AM and PM. There will be a session in Chinese on October 20. The webinars are free of charge. Click the links below to register - for free - for the session of your preference.

- [Tuesday, October 6 at 9 AM CEST](#) (English)
- [Tuesday, October 6 at 4 PM CEST](#) (English)
- [Tuesday, October 20 at 10 AM CST](#) (Chinese)

The duration of this webinar is 60 minutes. We present the same content in every session, no need to follow all.

What you will learn:

How a real existing automated CAM workflow system works, how it slashes costs, cuts turn-around time and produces consistent, reliable quality.

Who should attend:

- CAM managers
- Production managers
- CTOs
- COOs
- CEOs
- Decision makers

Recordings of the other webinars in our series (about YELO, SEC, MDPO) are available [here](#).
