**FOR IMMEDIATE RELEASE**

## Hernon Awarded for New ReAct® 795 Acrylic Adhesive

**SANFORD, FL — September 2022** — Hernon Manufacturing, Inc.® is proud to announce that it received a 2022 Mexico Technology Award in the category of Adhesives / Underfills / Encapsulants for its ReAct® 795. The award was announced during a ceremony that took place Wednesday, Sept. 21, 2022 during SMTA Guadalajara in Mexico.

ReAct 795 is a tough acrylic adhesive designed primarily for securing of ceramic permanent magnet segments in motor magnet bonding applications. It is particularly effective when adhesive squeeze out needs to be cured instantly via UV light. This adhesive has also found wide acceptance in a variety of structural bonding applications due to its versatile performance capabilities.

ReAct 795 has demonstrated the ability to provide high tensile strength while maintaining excellent product flexibility. This results in tough, durable bonds with outstanding impact and peel resistance. This tough acrylic is a single component, room temperature curing adhesive which is used in conjunction with Activator 47. Additionally, exposure to a high intensity UV light will cure this adhesive to a dry, hard surface.

The Mexico Technology Awards acknowledge the latest innovations available in Mexico produced by OEM manufacturing equipment and materials suppliers during the last 12 months. For more information, visit [www.mexicoems.com/mta-awards](http://www.mexicoems.com/mta-awards).

With more than 44 years of engineering excellence, Hernon is a worldwide innovator in high-performance adhesives and sealants, and precision dispensing equipment. The company offers a complete array of solutions for its clients—including customized formulas, dispensing equipment and UV curing equipment—to support an efficient, cost-effective design and production process.
