**Insituware Receives Major Industry Award for New  
Vision MARK-1 Device for Conformal Coating**

**MULLICA HILL, NJ — November 2021 —** Insituware LLC, the developer of the first smart measurement solution for quality control of materials, received a 2021 GLOBAL Technology Award in the category of Conformal Coating for the Vision MARK-1 Conformal Coating Fitness for Use Kit.

This revolutionary device developed for volume manufacturing is key to ensuring materials consistency right before the application of conformal coatings on the production floor. This is critical to safeguarding the process yield and reliability of conformal coatings. The Vision MARK-1 also offers high accuracy and repeatability to help electronics manufacturers meet the requirements of various quality standards.

“Insituware’s technology provides the complete solution to improve quality control for materials,” says Christopher Frederickson, CTO of Insituware. “The Vision MARK-1 has already helped companies reduce coating failures in their process by monitoring and tracking the behavior of their coatings.”

This capability is currently enabling OEMs in automotive, aerospace, defense, and medical to take control of their materials, improve manufacturing efficiency, and prevent conformal coating related defects in their application process. EMS companies are gaining proof of materials control and traceability to validate their product quality to these customers.

The handheld Vision MARK-1 device is powered by analytical sensors, machine learning, and cloud-based technology to bring materials control solutions right on the factory floor. Insituware

continues to develop new materials control solutions for manufacturers to help them drive towards Industry 4.0.

The GLOBAL Technology Awards have recognized the very best new innovations in the printed circuit assembly and packaging industries since 2005. The prestigious awards contest has been bringing together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward. ### **About Insituware LLC**

Insituware is an innovative technology company developing novel products to measure materials in the electronics manufacturing industry. Driven by advanced analytical sensors, smart devices, and intelligent cloud-based information, these revolutionary hand-held tools enable rapid, real-time inspection to improve material quality control, increase efficiency, and lower cost. For more information, visit [insituware.com](http://insituware.com).
