**Juki Receives NPI Award for iCube HighFlex Selective Solder System**

**MORRISVILLE, NC — April 2021** — Juki Automation Systems (JAS), Inc., a world-leading provider of automated assembly products and systems and subsidiary of Juki Corporation, received a 2021 CIRCUITS ASSEMBLY NPI Award in the category of Soldering – Selective for its new iCube HighFlex. The award was announced during a special online awards ceremony on Tuesday, April 6, 2021.

The new iCube HighFlex offers the same complete “all-in-one” package that the original iCube offers. All existing features and options are available on the newest selective solder machine. New features are available to improve the machines overall performance and help with ease of maintenance.

The new fluxer cleaner allows for dramatically reduced maintenance of the fluxer head. Using a special cleaning fluid, any flux residues and other contamination is dissolved and automatically cleaned from the flux head at a user defined interval.

Introduced in 2008, the NPI Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.
