ARCADIA Redefines Inventory Control Systems with ARCHIMEDE Smart Storage System

November 2023 — Kübler GmbH High Tech Solutions celebrates a successful presence at Productronica 2023, held in Munich, Germany. The premier showcase witnessed Arcadia's innovative advancements, notably the ARCHIMEDE Smart Storage System, a revolutionary solution that earned global recognition at the recent 2023 Mexico Technology Awards.

This groundbreaking system reimagines efficient storage, accommodating SMT reels, tubes, and trays with unparalleled accessibility and organization. Its space-efficient design, occupying a mere 0.45 square meters, seamlessly integrates into space-constrained environments. With rapid access capabilities—reel storage in just 5 seconds and retrieval under 3 seconds—ARCHIMEDE significantly minimizes production downtime.

Moreover, ARCHIMEDE streamlines production control through Bill of Materials (BoM) management, real-time stock updates, and Industry 4.0 readiness, offering full traceability and

integration with Material Requirements Planning (MRP) software.

Arcadia's impressive showcase at Productronica included partnerships with industry leaders like Panasonic and Essemtec, reinforcing their commitment to innovation and industry collaboration.

Boris Kübler, General Manager at Kübler GmbH High Tech Solutions, stated, "Arcadia's ARCHIMEDE Smart Storage System has set new benchmarks in inventory control. Its innovative design and efficiency make it a game-changer, poised to transform component management across industries."
