Kubler US to Showcase Arcadia's Galileo and Archimede Systems at IPC APEX Expo 2024

March 2024 — Kubler High Tech Solutions US is thrilled to announce its debut representation of Arcadia in booth 1715 at the upcoming IPC APEX Expo, taking place from April 9-11, 2024, in Anaheim, CA. This marks the first time Kubler US will exhibit the Galileo and Archimede machines stateside, highlighting the innovative solutions offered by Arcadia in the field of smart storage systems.

Arcadia's Archimede system isn't just about storage; it's about revolutionizing efficiency in vertical component storage. With features like optimized space efficiency, rapid reel storage and retrieval, versatile configurations, and Industry 4.0 readiness, Archimede is set to redefine how manufacturers manage their components.

The Galileo Incoming System from Arcadia streamlines component management with automated barcode detection, eliminating manual labeling errors and accelerating data collection. With its Industry 4.0 readiness, Galileo optimizes processes, minimizes management time, and eliminates sorting errors, making it an essential tool for efficient operations.

As part of its expansion strategy, Kubler US has secured top-tier reps SmartSol in Mexico, The Murray Percival Co in the Midwest, and PIT Equipment Services in the Northeast, with more signing on currently. These partnerships will ensure wider accessibility to Arcadia's innovative solutions across North America.

Don't miss out on the largest event in North America for the electronics manufacturing industry...join us in booth 1715 in Anaheim, California, from April 6-11, 2024!
