Libra Industries Celebrates Opening of New Manufacturing Clean Room in Dayton, OH

DAYTON, OH — August 2024 — Libra Industries, a privately-held systems integration and electronics manufacturing services (EMS) provider, is excited to announce the opening of its new manufacturing clean room at the Dayton facility. This state-of-the-art clean room is set to enhance their capabilities, reflecting their commitment to technological advancement and

operational excellence.

The ribbon-cutting ceremony, which was held on August 15, was not just a celebration of Libra's expansion but also a testament to the resilience and innovative spirit of our team. "Many manufacturing and tier 1 & 2 manufacturing supply companies struggled during COVID, and Libra was no exception,"

remarked Julie Sullivan, Executive Vice President of Regional Development at the Dayton Development Coalition. "However, the unique opportunities in the semi-conductor/lithography industry allowed the talented local team here at Libra to immediately pivot, giving way to new R&D processes with streamlined procedures in this industry. We're grateful they were willing to work with DDC and JobsOhio to explore these opportunities."

"The opening of our new manufacturing clean room in Dayton marks a significant milestone in our commitment to advancing semiconductor fabrication capabilities in the region," commented Andrew Williams, CEO of Libra Industries. "This investment not only reflects our dedication to innovation and growth but also underscores our role in contributing to the local economy. By creating new jobs and bringing cutting-edge technology to Dayton, we are reinforcing our long-standing tradition of excellence while looking forward to a bright future in the semiconductor

industry. We're proud to continue our journey with the support of our incredible team and the Dayton community."

This new facility marks a significant milestone in Libra Industries' strategy to support growth fueled by the burgeoning demands of the semiconductor sector. With an investment of \$2.1 million and the creation of 31 new jobs, this project not only amplifies our manufacturing capacity but also solidifies our presence in Dayton's tech-driven landscape.

Libra Industries continues to invest to provide customized manufacturing solutions for its customers' complex product requirements. Through its broad range of capabilities, Libra offers its customers the most capable manufacturing team in the industry. For more information about Libra Industries, visit www.libraindustries.com.
