

**FOR IMMEDIATE RELEASE**

**National Circuit Assembly, Inc. Hires New Account Manager**

**GARLAND, TX - June 2021** – NCA, a U.S.-based electronic manufacturing partner to entrepreneurs and OEMs nationwide, is proud to announce the official hiring of Steve Abeyta to the role of Senior Account Manager. As a seasoned professional in positions across the contract manufacturing industry, Steve brings several valued skills to NCA's growing team.

Abeyta's contract manufacturing career began in the packing room, where he learned the ins and outs of the manufacturing process. He worked his way up to a supply chain management role, where he coordinated with customers, suppliers, buyers and his team to ensure top-notch procurement quality.

Abeyta's most recent experience includes 17 years as a Jack-of-all-trades. Previously, Abeyta ran sales, quoting and estimating, supply chain management and quality control for a contract manufacturing firm in the Dallas-Fort Worth area.

When asked what drove him to join NCA's team, Steve mentioned the firm's new ISO 13485:2016 certification — which allows CMs to dive into the medical device manufacturing industry — and the company's 65,000+ square foot facility, which allows for a higher production capacity than local competitors.

"Bringing in a Senior Account Manager with the skillset and experience Steve has is huge for NCA's future," said Mark Cottam, VP of Sales & Marketing for NCA. "His experience in departments across the contract manufacturing business really strengthens our ability to tackle new industries, including the medical devices market. You don't find people with a work ethic and background like Steve every day, so his addition to our team is an exciting event, strengthening the flame of NCA's bright days ahead."

NCA welcomes Steve to the team and is excited to get to work expanding its reach into new industries.

###
