Intelligent Manufacturing Solutions, LLC. (IMS) Installs Assure™ X-ray Component Counter from DAGE at its Manchester, NH Operation

Manchester, New Hampshire (January 6, 2021) — Intelligent Manufacturing Solutions, LLC (IMS), the leader in PCBA rapid prototype and on-demand electronics manufacturing, recently installed the Assure™ X-ray Component Counter from DAGE, part of Nordson ELECTRONICS SOLUTIONS, at their Manchester, NH location. More than a [Printed Circuit-Board Assembly \(PCBA\)](#) or Electronics Manufacturing Services (EMS) provider, IMS is a partner committed to working smarter and faster — in a way that puts customers first. The company focuses on high-mix, low-volume production and specializes in rapidly sourcing, assembling and testing short runs quickly, efficiently, and cost-effectively.

The IMS business model is all about speed because, for its customers, time to market (TTM) is critical. The IMS [Rapid Prototyping](#) service model enables R&D engineers to improve their design cycles and get product to market much faster.

Kevin Morrisette, IMS CFO, said, “Over the past 15 years, IMS has proactively invested in capital equipment to ensure we are always on the cutting-edge of PCBA manufacturing technology. It is in IMS’s DNA to be the absolute leader in technology offerings for our blue-chip list of clients. The most innovative companies require their EMS provider and development partners to have the highest level of technology capabilities. The DAGE Assure X-ray Counter checks every box.”

Todd O’Neil, Business Development Manager, DAGE | X-ray component counting, stated: “Having another machine locally near my office in New Hampshire is convenient. But what matters most is having another satisfied customer taking full advantage of the simplicity of our Assure component counters. IMS is a perfect example of how this machine can fit into any style of manufacturing. As Mr. Morrisette mentioned, they believe in ‘working smarter and faster, in a way that puts their customers first’. We feel the exact same way at DAGE, which is why we also focus on making our machines smart and fast and putting customers first.”

Inventory knowledge is essential for modern industry. Whether a surface-mount technology (SMT) manufacturer, supplier or broker, live assurance of correct inventory in the MRP system at all times

minimizes stock, labor, errors and costs, ensuring customer confidence and trust. Keep your SMT lines running.

Assure™ is the fastest, simplest and most reliable way to implement live component inventory management into your organization. Intelligent, simple, fast, and trustworthy, Assure™ enables you to increase productivity and minimize component shortage downtime.

Intelligent Manufacturing Solutions, LLC

Intelligent Manufacturing Solutions (“IMS”) is a leading provider of electronics manufacturing services with a unique specialization in quick-turn assembly of prototype, high-mix printed circuit boards, and build-to-order assemblies for customers primarily located in the Northeastern United States. IMS services a wide range of industries and assists customers with new product prototyping (with one, three, and five-day service available) and production assembly, inspection, and testing. IMS is based in Manchester, New Hampshire and was founded in 2005 to address a service gap in the market for high-quality, rapid prototype assembly, and [small lot printed circuit board assembly](#).

Introducing Nordson ELECTRONICS SOLUTIONS

Nordson ELECTRONICS SOLUTIONS offers its customers a robust product portfolio, including precision fluid dispensing, plasma surface treatment, selective soldering, and test and inspection capabilities. Comprised of eight complementary Nordson Corporation product brands – ASYMTEK, DAGE, DIMA, MARCH, MATRIX, SELECT, SONOSCAN and YESTECH – Nordson ELECTRONICS SOLUTIONS is uniquely positioned to serve its customers with best-in-class precision technologies, passionate sales and support teams, global reach, and unmatched consultative applications expertise.

About DAGE

Headquartered in Aylesbury, UK, [DAGE](#) manufactures and supports a complete range of award-winning digital X-ray inspection systems and bond test equipment for the printed circuit board assembly and semiconductor industries. For more information, visit www.nordsondage.com.
