SMTA Europe Announces 2024 Spring Conferences

MINNEAPOLIS, Minn. -- The SMTA announces three conferences taking place in Europe this spring.

The Advanced Electronics Assembly Conference (AEAC) will co-locate with InnoElectro, 24 April 2024 in Budapest, Hungary. This strategic venue selection promises greater exposure, a larger audience, and the opportunity to attract high-quality attendees. Visit the conference website here: <https://smta.org/aeac>

County Clare, Ireland, is the location of the Advanced Manufacturing Conference and Line Tour on 9 May 2024. The conference will feature three distinct sessions covering Product Management, Advanced Manufacturing, and Sustainability. A tour of the Ei Electronics manufacturing facility is planned for the afternoon. Details can be found here: <https://smta.org/event/AMC2024>

The following week the Electronics in Harsh Environments Conference takes place 14-16 May 2024 at the Technical University of Denmark in Copenhagen. This conference tackles the challenges and best practices for building reliable electronic devices that will perform to design standards when used in harsh environments and power electronics. Keynote presentations and professional development courses are featured each day of the event and included in conference registration. Details can be found on the conference website here: <https://smta.org/harsh>

If there are any questions, please call +1-952-920-7682 or email karlie@smta.org. For more information, visit <https://smta.org/europe>.

SMTA - A Global Association Working at a Local Level

The SMTA membership is an international network of professionals who build skills, share practical experience and develop solutions in electronic assembly technologies, including microsystems, emerging technologies, and related business operations.
