## **PVA Develops New Valve Kiosk Stand for an Array of Applications**

**Cohoes, NY – November 2022** – PVA, a global supplier of automated dispensing and coating equipment, is pleased to introduce its new Valve Kiosk Stand for trade shows. The innovative stand boasts 18 valves from PVA’s extensive valve product line that satisfy an array of applications including dispensing, gasketing, conformal coating, thermal interface material, underfill, jetting and potting.

When it comes to electronics manufacturing technology, a one-size-fits-all mentality just doesn’t fit. That is why PVA combines its application expertise with innovative dispensing robotics and precision valve technology to deliver each client a custom-built solution that revolves around their needs.

The new Valve Kiosk Stand features three 15.6” touch screen interfaces with an interactive user interface. It includes removable valves for closer inspection and in-depth breakdowns of each valve: Overview, X-ray, Operation, Applications & Dispense Patterns. Customers can navigate by Industry, Application, Valve type or “Request Help,” if you are new.

Dispensing can extend across numerous industries and applications that require dosing in an accurate and controlled manner. PVA’s award-winning valves and pumps are available to dispense a broad spectrum of chemistries to meet the requirements of the most demanding applications.

For more information about PVA, please contact PVA at [info@pva.net](mailto:info@pva.net) or (518) 371-2684.

### **About**

PVA’s customer driven solutions are utilized worldwide in applications for printed circuit assembly, semiconductor packaging, medical device manufacturing, telecommunications, solar, and consumer electronics. Throughout the changing global manufacturing landscape, from laboratory applications to advance production systems, PVA provides technologies that deliver unmatched precision and reliability.
