

PulseForge Awarded “Most Innovative New Product/ Commercialization” during CPES2022

AUSTIN, TEXAS – May 2022 – PulseForge, Inc., a new spinoff of NovaCentrix, is pleased to announce that it was awarded “Most Innovative New Product/Commercialization” during CPES2022 on Wednesday, May 18, 2022 in Toronto. Howard Campbell, board member of IntelliFLEX and co-organizer of the event, presented the award to Stan Farnsworth, Chief Marketing Officer at PulseForge.

In keeping with the themes and focus of CPES, PulseForge demonstrated its collaboration across the industry ecosystem between various industry and R&D players, to address real needs in various market verticals, including sustainability benefits.

PulseForge Inc.’s manufacturing technology is changing how products are designed through creating options for utilizing non-conventional and innovative materials while also improving costs and sustainability levels. The company is bringing its proprietary thermal processing technologies to the EMS market after years of application in display, RFID and photovoltaics production.

CPES is Canada’s premier conference and trade show exhibition for flexible and hybrid electronics (FHE) and is positioned to work with attendees to help build business, advance research and foster diversity across the industry ecosystem.

IntelliFLEX, a not-for-profit industry alliance, is a vital partner for accelerating the growth of the printable, flexible and hybrid electronics sector of more than 300 organizations across Canada. The technologies of IntelliFLEX members add intelligence and connect ordinary objects to enable the Internet of Everything.
