FOR IMMEDIATE RELEASE

Specialty Coating Systems to Host New Webinar on December 7th: “High-Reliability Coating Solutions for Demanding Environments”

November 30, 2021 (Indianapolis, IN) – Specialty Coating Systems (SCS) is pleased to announce that it is hosting a webinar on Tuesday, December 7, 2021 at 2 p.m. EST. “High-Reliability Coating Solutions for Demanding Environments” will be presented by Rakesh Kumar, Ph.D., Vice President of Technology, and Tim Seifert, Aerospace & Defense Market Manager. The webinar is now open for registration at scswebinars.com.

Protective coatings are often used in the aerospace and defense, electronics, transportation and medical device industries to increase the reliability of products by protecting them from their surrounding environments. As technologies continue to evolve and become more complex, often with tight space and weight considerations, it is vital that designers and manufacturers find the most effective solution to shield their products from a wide variety of potential threats.

This webinar will offer an opportunity to learn more about conformal coatings – various types of coatings, coating processes, applications protected by coatings today and the properties and benefits they offer products, including:

Dr. Rakesh Kumar and Tim Seifert

- Heavy-duty, yet lightweight barrier protection from moisture and chemicals
- High dielectric strength prevents arcing and associated shorts
- Excellent thermal stability (up to 450°C and down to cryogenic levels) for extreme environments
- Lubricity/low coefficient of friction
- Conformal coverage delivers uniform, high-level protection to all areas of a product

Several types of coatings will be addressed in this webinar, including Parylene conformal coatings that have protected numerous products and components, including circuit boards, sensors, MEMS/semiconductors, LEDs, implantable medical devices, elastomers and metals, in a wide array of applications. These products, and more, have benefited from the ruggedization Parylenes provide.

As materials and technologies continue to advance, a variety of coating solutions are being used to enhance reliability and add measurable value to applications around the world.

SCS is a leader in conformal coating services and technologies with coating facilities throughout the Americas, Europe and Asia. To learn more about SCS, please call +1.317.244.1200 or visit www.scscoatings.com.

About Specialty Coating Systems

Headquartered in Indianapolis, IN, SCS is a world leader in conformal coating services and technologies. As the direct descendant of the companies that originally developed Parylene, SCS has 50 years of experience and expertise that it leverages for its customers through coating facilities throughout the Americas, Europe and Asia. The company also offers industry-leading liquid coating systems including spray, spin and dip coating systems and ionic contamination test systems. For more information on SCS, please visit www.scscoatings.com.
