

Assel invests into new SMT Printer

Assel – polish Electronics Manufacturing Services provider with 40 years of experience has invested in new SMT Printer.

The new SMT printer - DEK TQ is super fast, highly precise, and a space-saver. It has a traceability function, tool verification, and Automatic smart pin support. Last but not least it is equipped with 50% faster-cleaning processes than the old one.

Some more innovations:

- Highly flexible 3-stage conveyor system
- Open and easy to integrate
- Efficient programming
- Double the capacity with back-to-back

Thanks to its new technology and communication standards it fits perfectly into Assel's park machine!
