SelecTech Recognized by NPI Awards for ESD Flooring

AVON, MA — January 2023 — StaticStop, a division of SelecTech, Inc., and leader in the manufacture of innovative ESD flooring products that save time and money, received a 2023 CIRCUITS ASSEMBLY NPI Award in the category of ESD for its SelecTile ESD in Colors. The award was announced during a ceremony that took place Monday, Jan. 23, 2023 in San Diego.

Industries that deal with manufacturing, shipping, warehouses and transportation all face similar problems in selecting a viable flooring solution. With SelecTile ESD Interlocking Flooring, companies have the only ESD product with no disclaimers for high-moisture, irregular and problematic subflooring. Now, the interlocking tiles are available in a new colored version. A metallic composite additive makes it possible to offer color options.

SelecTile ESD industrial flooring is made with a minimum of 20 percent recycled materials. Combined with extreme durability and quick installation, adding a customized color that matches your company's brand is just one more of the several benefits.

StaticStop's environmentally friendly electrostatic products offer total protection for electromagnetically sensitive products and procedures. From interlocking and glue-down vinyl, to epoxy, carpet tile and low-volt rubber, the company has the right ESD flooring solution for any needs.

Introduced in 2008, the NPI Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.

To request ESD flooring samples or information on the complete ESD Flooring line, please call 508-583-3200 or visit www.staticstop.com.

###

About StaticStop

StaticStop is a division of SelecTech, Inc., which was founded in 1993 with the mission of creating valuable products from scrap plastics. The company is a leader in the manufacture of flooring products from recycled materials and uses one million pounds of recycled materials annually. Their FreeStyle ESD and SelecTile ESD products are made with recycled content and are 100 percent recyclable. Both FreeStyle ESD and SelecTile ESD are installed without adhesives making them some of the “greenest” and most cost-effective flooring products available. The unique interlock system on StaticStop’s flooring products enable them to be installed at a much lower cost, without a lot of costly downtime, which provides significant value to customers. StaticStop interlocking flooring tiles are the only ESD products available that have no disclaimers for high-moisture, irregular, and problem subfloors.
