Sono-Tek Corporation Promotes Ronnie Teo to Technical Sales Manager – Asia Operations

Milton, NY — January 2023 — Sono-Tek Corporation (Nasdaq: SOTK), a leading manufacturer of precision ultrasonic coating solutions, is proud to announce the promotion of Ronnie Teo to Technical Sales Manager – Asia Operations. In his new role, Ronnie will be responsible for driving sales and expanding the company’s presence in the Asia market, with a focus on the electronics and advanced energy industries.

“We are thrilled to have Ronnie take on this new role and lead our efforts in the Asia market,” said Mark Zamzam, Executive Director Sales and Marketing, Sono-Tek Corporation. “His technical expertise and in-depth understanding of the industry make him the perfect fit for this position. We are confident that he will be able to grow our operations and increase our market share in the region.”

Ronnie has been with Sono-Tek for more than four years, and has played a key role in the company’s success in the Asia market. His extensive experience in the electronics and advanced energy industries will be a valuable asset to the company as it looks to expand its operations in the region. Sono-Tek values the ability to provide local customer support and Teo has been key to enhancing this aspect of global operations, both from a geographical standpoint as well as a deep understanding of Sono-Tek’s technology.

“I am excited to take on this new challenge and help lead Sono-Tek’s growth in the Asia market segments,” said Ronnie. “The precision ultrasonic coating solutions provided by Sono-Tek have enormous potential in electronics and advanced energy manufacturing, and I look forward to working with our team to explore new opportunities in the region.”

Sono-Tek Corporation is a leading provider of precision ultrasonic coating solutions for a wide range of industrial applications. The company’s advanced technology helps customers increase efficiency, reduce costs and improve product quality.

About Sono-Tek Corporation

Sono-Tek is the world leader in the development and application of liquid ultrasonic atomization technology into nozzle systems and spraying and coating application systems. Compared to conventional pressure spraying methods, the company's ultrasonic nozzles do not clog, reduce liquid usage, waste, and environmental impact while achieving much more precise, uniform, thin film coatings. Sono-Tek is continually developing new applications for its unique technology, replacing wasteful practices in a world that is growing ever more environmentally sensitive.
