

## **Karl Pfluke Joins South-Tek Systems as Electronics Market Manager**

**WILMINGTON, NC – April 2021** – South-Tek Systems, the world’s leading designer & manufacturer of nitrogen generation technology, is pleased to announce that it has hired Karl Pfluke as its Electronics Market Manager. In this role, Pfluke will utilize his 20+ years of sales and engineering knowledge in the SMT Electronics, Semiconductor, LED and Solar PV industries.

“We are excited about the addition of Karl Pfluke to our team as we continue to grow significantly in the electronics market,” stated Scott Bodemann, President. “N<sub>2</sub> generation has become an integral part of electronics manufacturing and is a real cost saving solution to companies that are in delivered nitrogen purchasing contracts.”

Pfluke holds a degree in manufacturing engineering, is SMT process engineer certified, and has his Six Sigma Greenbelt Certification. He has authored, co-authored, and has presented technical papers in the electronics industry.

South-Tek Systems has been designing and manufacturing dependable nitrogen generation technology since 1997 for a vast range of industrial, military, lab and commercial applications. South-Tek has 12,000+ systems installed worldwide in privately held businesses and Fortune 500 companies, all looking to drive cost savings and efficiency. South-Tek’s brand has been built on reliability, ease of integration into a customer’s manufacturing facility, and providing nitrogen generators that are quick and simple to maintain.
