## **StenTech Ramps Up Parts Division with Extended Capabilities Now in US & Canada.**

**DALLAS, TX. – January 2024 – StenTech® Inc.,** a leading global company specializing in SMT Printing Solutions, is excited to announce the expansion of its Parts Division in the United States and Canada. Specializing in laser cut and chemically etched precision metal parts, StenTech ensures that every component produced meets the exact specifications of each project. From initial prototypes to full-scale production, clients can rely on StenTech's expert manufacturing, engineering, and support teams.

*"This strategic move allows StenTech to offer extended capabilities and services to our current customers as well as opening up to a far-reaching broader market that includes **all industries** across North America,"* notes StenTech CEO Brent Nolan.

StenTech offers efficiency through rapid quoting, ensuring quick response times for pricing inquiries. Moreover, the company's low tooling costs make it more affordable for clients to bring their projects to fruition. Additionally, StenTech's fast turnaround times and ability to accommodate quick design changes further enhance the company's efficiency in delivering high-quality manufacturing solutions.

The enhanced emphasis on Parts significantly broadens the StenTech brand's range of offerings. Whether customers require 1 to 10,000+ pieces, expert design support, a diverse selection of materials and surface finish options, or swift turnaround with direct-to-factory ordering for prototypes or full-scale production, StenTech is ready to provide precision-quality parts across any volume scale.
