Thermaltronics Recognized by GLOBAL Technology Awards for Dual Port Solder Station

GREAT NECK, NY — November 2021 — Thermaltronics USA, Inc. is pleased to announce that it received a 2021 GLOBAL Technology Award in the category of Soldering Robots for its TMT-2200S – “simultaneous” dual port operating solder station. The award was announced during a ceremony that took place Tuesday, Nov. 16, 2021 during productronica in Munich, Germany.

The TMT-2200S is based on Curie Heat Technology that responds to the thermal demands of each solder joint by adjusting the power instantaneously, thereby meeting the exact requirements of the substrate component and solder material. Maximum flexibility allows the use of K, P and S Series tips for standard operating modes and KD series for those heavy-duty applications.

The award-winning solder robots have two operating modes. It can provide dual port simultaneous soldering or, by combining the power of the two ports, it can deliver superior power and performance, to meet the most demanding soldering applications.

The GLOBAL Technology Awards have recognized the very best new innovations in the printed circuit assembly and packaging industries since 2005. The prestigious awards contest has been bringing together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward. For more information, visit www.globalsmt.net/awards.

In addition to the hand soldering product line, Thermaltronics also provides an extended range of accessories to support both production and rework applications. Customers who wish to run free of charge trials on Thermaltronics hand

soldering products are encouraged to contact info@thermaltronics.com. For more information about Thermaltronics award-winning solder robots, visit www.thermaltronics.com.

About Thermaltronics USA, Inc.

Thermaltronics is a manufacturer and supplier of a wide range of soldering products and accessories used in the electronics manufacturing industry. Design and development is undertaken in the USA and Australia, with final production taking place in a customized manufacturing facility, incorporating specialized equipment and in accordance with recognized international standards of quality and compliance.

In addition to the modern factory, Thermaltronics maintains an office and warehouse in New York State, commercial offices in Hong Kong and a Distribution Sales Office in Perth Australia.

All Thermaltronics products are produced in accordance with ISO 9000 & ISO 14000 standards and meet either TUV, GS, CE or NRTL safety requirements. Strict quality control procedures are in place and product warranties are among the best in the industry. For more information, visit www.thermaltronics.com.
