

## Press Release

### **Viscom Inc. Exhibiting at SMTA International 2023**

***Duluth, GA, August 24, 2023 – Viscom Inc., the US subsidiary of Viscom AG, Germany, will be exhibiting at the SMTA International 2023 Expo in Minneapolis, MN, October 10–11, in Booth No. 1413. Viscom experts will be on hand to answer questions and offer manufacturing solutions on their wide range of award-winning AOI/AXI/MXI inspection systems.***

Viscom offers 3D SPI, 3D AOI, 3D AXI, and 3D MXI systems for inspection of densely packed printed circuit boards as well as components such as IGBT modules in power electronics. Visitors can also learn more about the latest software developments at Viscom, such as AI-assisted verification and inspection program generation. Juan Briceno, Vice President of Sales Viscom Inc., states: “SMTA International is a very important exhibition for us. Decision makers, industry experts and other key manufacturing players with very different backgrounds are present and we look forward to showcasing our inspection solutions.”

The booth staff can advise on how Viscom inspection systems combine outstanding performance with high throughput – plus modern networking solutions such as IPC HERMES 9852 or IPC CFX, as well as new condition monitoring and AI applications.

**About Viscom**

Founded in 1984, Viscom AG is one of the leading suppliers worldwide in the field of assembly inspection within electronics production. With its headquarters and production site in Hanover, Germany, the company develops, produces and sells high-quality inspection systems from the areas of AOI, SPI, AXI, MXI, wire bond inspection as well as conformal coating inspection. The systems developed and manufactured in Hanover set high standards in terms of accuracy and speed. The product range covers the complete spectrum of optical inspection and X-ray inspection for small and medium-sized companies as well as for large series production. Viscom systems are used for 100% automatic inspection of electronic assemblies such as those used in the production of automotive electronics, aerospace technology or in the manufacture of telecommunications electronics.

Product development also focuses on customer-specific system developments and networking with other production processes for smart factory applications. In order to achieve this, Viscom AG increasingly invests in its own software and hardware development which is constantly defining new standards in inspection technology.

International sales are handled by a broad network of its own subsidiaries, application centers, service centers and representatives. A service team of in-house technicians and application specialists commission Viscom systems worldwide, offering maintenance, conversion and modernization from a single source. In addition, system-specific training courses are offered for customers' operators, programmers and maintenance personnel. Experienced engineers and technicians from the application and service departments share their expert knowledge with participants.

Viscom AG has been listed on the Frankfurt Stock Exchange since 2006 (ISIN: DE0007846867).
