ZESTRON Academy to Host FREE “Jet Printing and Cleaning Challenges” Webinar

Manassas, VA –May 3, 2021 [ZESTRON](#), the global leading provider of high precision cleaning products, services, and training solutions in the electronics manufacturing and semiconductor industries, is pleased to announce that it will host “Jet Printing and Cleaning Challenges” on Tuesday May 25th, from 11:00 AM to 12:00 PM EST. This is the third installment of the ZESTRON Academy 2021 Cleaning Webinar Series, and will be presented by our industry expert, Kalyan Nukala, M.S.Ch.E, Application Engineer.

Webinar Abstract:

Today’s production environments are overcoming printing challenges by incorporating jet printing as an additional add-on step to add extra solder paste volume when needed. Typically, jet printing pastes use Type 5 and 6 solder powder compared to type 3 and 4. As cleaning remains critical to long-term reliability, jet solder pastes have proven more difficult to clean. Join ZESTRON Academy to explore the reasons behind the increased cleaning challenges with comparative cleaning trial data and customer case studies. For more information or to register for this free webinar visit us [online](#).

About ZESTRON:

ZESTRON is headquartered in Manassas, Virginia and operates in more than 35 countries. With eight technical centers worldwide and the industry’s most knowledgeable team of engineers focused on high precision cleaning, ZESTRON’s commitment to ensuring that its customers surpass even the most stringent cleaning requirements is without equal.
