KYZEN to Feature Analyst² RI at SMTA Dallas Expo and Tech Forum

NASHVILLE — March 2026 — KYZEN, the global leader in innovative environmentally responsible cleaning chemistries, will exhibit at the SMTA Dallas Expo and Tech Forum, scheduled to take place April 7, at Plano Event Center in Plano, TX. The KYZEN Clean Team expert Kevin Buckner will be on-site providing attendees with information about the new KYZEN Analyst² RI precision chemistry monitoring system.

In addition to formulating award-winning chemistries, KYZEN innovates by producing effective technologies to monitor concentration of those chemistries in real time, including KYZEN Analyst² RI.

KYZEN Analyst² RI uses advanced sapphire-based Refractive Index technology to provide users with real-time chemistry concentration reporting with a variety of cleaning chemistries including those not produced by KYZEN. Analyst² RI provides more precise measurements than other sensor devices with enhanced on-device process analysis and traceability.

KYZEN Analyst² RI is intuitive and easy to install while featuring real-time charting data, historical data charting, customizable event logs, and the ability to work entirely off-line. It represents the natural evolution of previous KYZEN Analyst models with more than 250 successful installations and developments based on customer feedback.

For more than 35 years, KYZEN has remained committed to Science and Care while leveraging continuous improvement to provide effective cleaning chemistries and process measurement tools across the globe. For more information, visit www.kyzen.com.

About KYZEN

KYZEN is a global leader in providing environmentally responsible, RoHS compliant precision cleaning chemistries for industries ranging from electronics and advanced packaging to metal finishing and aerospace applications. Since its founding in 1990, KYZEN's innovative cleaning technologies, scientific expertise and customer support have been repeatedly recognized with the industry's most prestigious awards.
