KYZEN Focuses on Aqueous and Stencil Cleaning Solutions at SMTA Monterrey Expo and Tech Forum

NASHVILLE — April 2026 — KYZEN, the global leader in innovative environmentally friendly cleaning chemistries, will exhibit at the SMTA Monterrey Expo & Tech Forum scheduled to take place on Thursday, April 23 at Cintermex Convention Center in Monterrey, Nuevo León. KYZEN cleaning experts will be on-site providing information about aqueous chemistry AQUANOX A4618, under stencil cleaning chemistry KYZEN E5631J, and the KYZEN Process Control System (PCS).

KYZEN understands the challenges faced by electronics manufacturers when unclean finished PCBs and stencils impact the functionality of assemblies. To alleviate these issues, KYZEN provides effective cleaning chemistries like AQUANOX A4618 and KYZEN E5631J in addition to process control tools like KYZEN PCS.

[AQUANOX A4618](#) is a groundbreaking aqueous cleaning chemistry designed to address the challenges of cleaning contemporary lead-free flux residues, including no-clean residues, while achieving immaculate, mirrored solder finishes. It is formulated to effectively clean all flux types and boasts a long tank life with high efficacy at lower concentrations and temperatures.

[KYZEN E5631J](#) is a ready-to-use, cost-effective solution for removing raw solder paste from stencils in online and offline stencil cleaning processes. Proven compatible with common stencils, cleaning equipment, and printer manufacturers, E5631J quickly and efficiently cleans all types of raw solder paste to ensure every print counts.

The [KYZEN Process Control System](#) controls, monitors, and effectively reacts to the dynamic changes wash bath concentrations. KYZEN PCS is designed to maximize output from inline cleaning systems and remains the only complete concentration monitoring and control system in the world.

For more than 35 years, KYZEN has developed innovative chemistries and process control instruments to work hand in hand with a wide range of cleaning process. For more information, visit www.kyzen.com.

About KYZEN

KYZEN is a global leader in providing environmentally responsible, RoHS compliant precision cleaning chemistries for industries ranging from electronics and advanced packaging to

metal finishing and aerospace applications. Since its founding in 1990, KYZEN's innovative cleaning technologies, scientific expertise and customer support have been repeatedly recognized with the industry's most prestigious awards. For more information, visit www.kyzen.com.
