## Rhopoint Celebrates 50 Years of Technical Excellence

Rhopoint Components Ltd. a specialist technical distributor of precision electronic components and sensors is proud to celebrate its 50th anniversary in September 2025. Since its founding in 1975, the company has established a reputation for design-led distribution, delivering engineering solutions that meet the most demanding requirements across aerospace, oil, gas, EV, automotive, medical, energy and industrial markets.

*The range of sensors available from Rhopoint Components*

Over the past five decades, Rhopoint Components has grown from a UK-based supplier into a trusted international partner with a strong European presence served by German subsidiary, Rhopoint Components GmbH. The company is part of the Rhopoint Group

and represents some of the world's most innovative manufacturers, including long-standing partnerships with Isabellenhütte, VPG Foil resistors, SRT Microcéramique, and many others.

"Reaching our 50th year is a major milestone and a testament to the trust our customers and suppliers have placed in us," said Omer Mirza, Joint Managing Director of Rhopoint Components. "Our commitment to quality, service, and engineering-led support has allowed us to grow consistently while staying focused on the specific technical needs of our customers."

David Beatson, Joint Managing Director, shared his forward-looking vision: "As we look to the future, we see tremendous opportunities in emerging technologies and evolving customer needs. Our investment in expanded product ranges positions us perfectly to support the next generation of engineering innovations. We're committed to being at the forefront of technological advancement while maintaining the technical understanding of customer applications that has always been our hallmark."

# Press Release

Rhopoint Components continues to invest in people, partnerships, and platforms to support the evolving needs of design engineers and procurement professionals. From ultra-precision resistors and high-reliability capacitors to pressure sensors and custom solutions, the company's product portfolio reflects a clear focus on performance-critical applications.

## **Background:**

- Rhopoint Ltd was founded in 1975 with the aim to support engineers specialising in the design of electronics and product development by offering a selection of precision resistors to the UK market.
- The Rhopoint name originates from two ideas.  
Firstly, the Greek letter  $\rho$  (pronounced rho). This is the symbol that represent electrical resistivity; the fundamental property of a material that quantifies how strongly it resists or conducts electrical current.

Secondly the word "point," in the context of measurement, is defined as a definite measurable position in a scale, thereby signifying precision.

- The company was named Rhopoint to highlight their competence in the ever-evolving world of precision resistors. The first product sold in 1975 was a high-precision wire-wound resistor from General Resistance. These products still represent part of the Rhopoint portfolio today, over 45 years later!

Mrs Dawn King, Marketing Director, Rhopoint Components Ltd., says, "Rhopoint has become a major player in the component distribution market by offering a winning combination of in-house expertise and careful selection of key, global suppliers that can support the most demanding requirements. Some of our internal sales team have been with the company 25+ years and have more familiarity with a manufacturer's products than the actual manufacturer! As a specialist distributor we can function as a multiplier for supplier, designer and buyer, bringing together a wide range of components from qualified suppliers and facilitating the supply of application specific and custom products where required."

# Press Release

Rhopoint is an authorised partner for over twenty-five industry-leading manufacturers from around the world offering an extensive range of stocked lines and fully customised solutions to meet customer requirements. With highly skilled field-based sales engineers, technical expertise is backed by an efficient sales and distribution operation, covering their entire product range, from their UK based facility.

## About

Rhopoint Ltd. was founded in 1975 with the aim to support engineers specialising in the design of electronics and product development by offering a selection of precision resistors to the UK market.

Rhopoint Components Ltd has built a reputation of quality service and parts by providing a secure and trustworthy distribution for electronic components, sensors and resistors to their customers. This is maintained through the effective implementation, ongoing maintenance and continual improvement of management systems. These include BS EN ISO 9001 certified quality management system and Cyber Essentials certification.

Within the field of Test and Measurement, Rhopoint is a group of companies specialising in the design, manufacture, distribution, service and calibration of high precision products into niche markets, globally.
